

PUBLIC SAFETY COORDINATION SYSTEM

Video Surveillance

Incident Management

Collaborative mapping

Reporting and data analysis

Vehicle and staff monitoring

GINA Central is a modern tactical AVL software providing real-time information designed for management and coordination of emergency vehicles and first responders during routine as well as special operations.

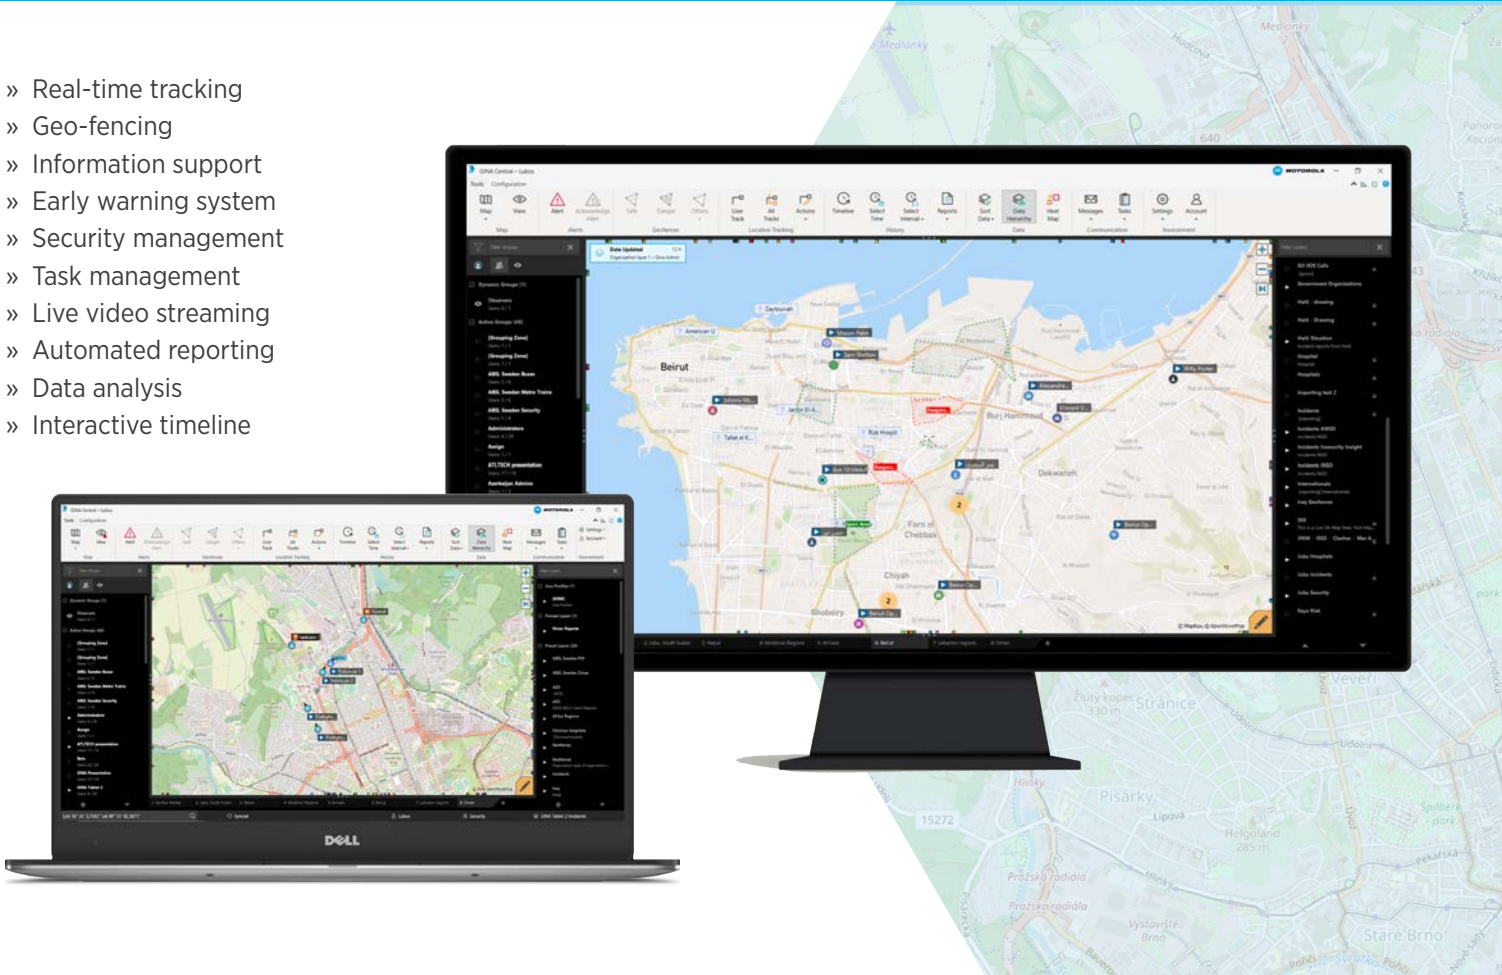

GINA Central serves as a unified collaborative platform connecting a variety of devices with GPS module including radios, GSM and satellite tracking trackers, smartphones, tablets, UaVs and sensors into one interface. GINA Central provides a combination of real-time visibility of all units and live data feeds with additional features such as task management, video surveillance, data analysis, historical timeline and automated reporting.

GINA Central is complementary to primary PSAP or CAD systems and thanks to its tactical features is an ideal tool for management of search and rescue missions, large scale incidents or disaster relief operations.

FEATURES

- » Real-time tracking
- » Geo-fencing
- » Information support
- » Early warning system
- » Security management
- » Task management
- » Live video streaming
- » Automated reporting
- » Data analysis
- » Interactive timeline

WORKSTATION REQUIREMENTS

- » MS Windows 10 OS
- » CPU equivalent dual-core 2 GHz
- » 4 GB RAM
- » 1 GB HDD space

SERVER REQUIREMENTS

- » MS Windows Server 2016 or higher
- » MS SQL 2016 or higher
- » CPU equivalent quad-core 2 GHz
- » 8 GB RAM
- » 1 TB HDD space
