Command with Clarity Respond with Confidence

Modernize emergency response with Smart CAD: a streamlined, intuitive solution for unit dispatching and incident management.

Enhance call-taking, dispatching, and field coordination with rapid, informed decision-making, facilitated by a user-friendly interface and minimal training requirements.

Call-taker & Dispatcher

Optimize communication, **streamline dispatching,** and simplify call handling for efficient workflow.

Elevate your operations with unit visibility, integrated **CCTV streams,** and comprehensive incident logs.

Field staff

Access **real-time critical incident information** and consistently maintain seamless communication with other units.

Boost field operations with real-time updates, **emergency navigation,** and multimedia sharing for quick response.

Supervisor

Stay informed and ready with **situational updates and unit statuses.**

Maintain awareness with real-time location, data, and **communication tracking**, along with a **multimedia archive**.

David Jirous

Head of Emergency Operation Center
Fire Rescue Service of the Czech Republic

"GINA significantly improves the efficiency of both routine and special operations, reduces arrival time, provides real-time information support, and increases the level of cooperation among all responding units. Thanks to technology we can react flexibly to changing situations in the field."

INTUITIVE INTERFACE   **INFORMED ACTIONS**   **EASY DEPLOYMENT**
