Tactical AVL

Software for enhanced situational awareness

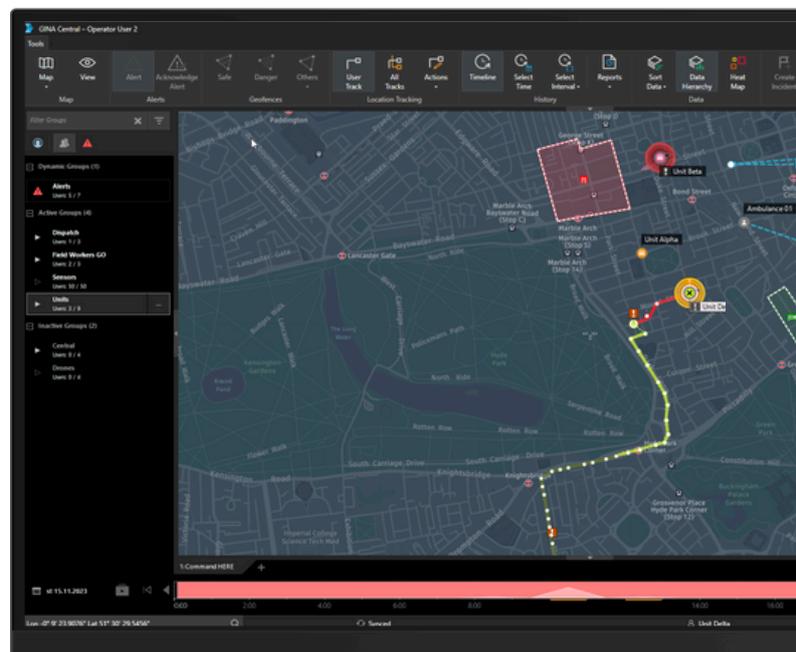

Our customers

Track with Certainty
Act with Insight

Elevate situational awareness with Tactical AVL: a comprehensive, integrated solution for advanced location tracking and operational intelligence.

Optimize coordination through the seamless integration of trackers, video, and data analytics, enhanced with geofencing and automatic alerts, ensuring a swift, effective response.

Location tracking

Gain real-time insight and **movement history tracking** of up to 100k users simultaneously.

Efficiently **monitor unit movements** via radio, tracker, or mobile app, ensuring swift, informed decision-making. Generate direct, **detailed reports** with ease.
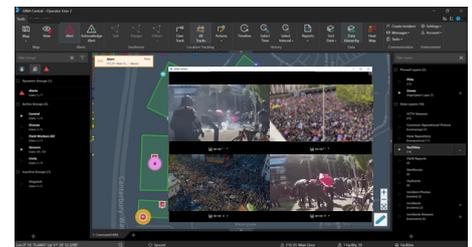

Alerts & Geofencing

Maximize safety and security with real-time geofencing and **automated alert systems.**

Quickly set up geofences for areas, routes, or operational needs, triggering instant alerts for critical events. Ensure a rapid response with **alerts activated by sensors** or user actions.

Video monitoring

Rapid response is enabled through **integration with VMS** utilizing alerts.

Integrate video systems capable of detecting unusual behavior or unauthorized individuals. These smart systems prompt **immediate alerts,** ensuring a quick response to threats.

Liam Ryan
CEO, GM Risk Group

GM RISK GROUP

"We have been working with GINA for a few years now and have found the software solutions to be a functional tool for our teams on the ground, plus a value add to our clients through our increased service capabilities.

GINA provides our team and clients with high-level situational awareness by allowing us to tailor how we integrate, manage and share intelligence that is relevant to our teams and task objectives."

SEAMLESS INTEGRATION

DATA-DRIVEN DECISIONS
